Subject: Wilcox Update

Good Day Everyone, I wanted to provide this update along with a couple of resources for documents. We will be out in the field during the weeks of September 12 and 19 to complete ground water sampling, vapor intrusion sampling, Lorraine Refining Well investigation, and reconnaissance of the North Tank Farm, the East Tank Farm and the Creeks. As information comes our way, we will share the data and documents.

1. The draft FSP shared back in July has been finalized with only minor edits to text and tables. A copy via email is forthcoming.
2. The Wilcox Oil Company Web page now has documents available for download: early investigation reports, the draft FSP, the Final Direct Sensing and Geophysics Report, the final Architectural Cultural Report, and the community meeting slides, notes, factsheets. Some of these documents are also on the Wilcox one drive site. For the one drive, you may need to create a user name and password to access.
3. Soil sampling has been pushed to October (weeks 17 and 25) so that we have time to review the passive gas data that was collected in August.

As always, call with any questions.

The screenshot shows the EPA Superfund Program website for the Wilcox Oil Company in Creek County, Oklahoma. The page features a map of the site, a list of documents for download, and a sidebar with navigation links. The main content area includes a title 'Wilcox Oil Company Superfund site: Creek County, OK', a brief description of the site, and a list of documents for download. The sidebar contains links to 'Home', 'About the Site', 'Documents', 'Contact Us', and 'EPA Region 6 Intranet'.
